

Myers Industries Lawn & Garden Group  
**U.S. Recycling Program**

- **Collect recyclable plastic** materials and sort them by type\* – #2 Polyethylene, #5 Polypropylene or #6 Polystyrene  **High Density Polyethylene**  **Polypropylene**  **Polystyrene**
- **Clean material** and remove any loose debris
- **Bale or palletize products** – pallets need to be stretch wrapped and stable
- **Returns must be a minimum full truckload** quantity of baled or palletized plastic material. Some Myers Industries Lawn & Garden Group distributors will consolidate smaller quantities of plastic into truckloads, so please check with your distributor for details.
- **Contact a Myers Industries Lawn & Garden Group Distributor**, Sales Representative or Customer Service Representative at 800-225-7712. Advise them of the details of your pick-up, including type of material, condition of material, amount of materials being returned, contact information, etc.
- After your initial contact, a recycling facility will contact you to arrange the return by either:
  - **Scheduling a pick-up** of your material by the Myers Industries Lawn & Garden Group, or;
  - **Coordinating the delivery** of your material by your truck
- **Upon delivery**, the recycling facility will inspect your load to evaluate its condition and determine weight. Any issues with the returned materials will be reported back to you through your Myers Industries Lawn & Garden Group representative.

\*Acceptable plastic types:

**Polyethylene** – Blow-molded nursery cans from 1 gallon to 65 gallons. Very tough and flexible, usually black in color, and similar plastic to water and milk jugs.

**Polypropylene** – Injection-molded grower pots, including 2-color co-extruded pots, hanging baskets, patio pots, flats and hard plug trays. Stiff, but flexible plastic, capable of breaking when enough pressure is applied.

**Polystyrene** – Thermoformed bedding plant cell packs, carry trays, plug trays, specialty packs and propagation sheets. Crystalline and more brittle than polypropylene, will shatter when subjected to impacts.
